Markup Assistant: Mark up your drawings with just a few clicks to clarify your thinking and maximize collaboration. Draw annotations, insert details, arrows, and symbols right on top of your design. (video: 1:30 min.) Model Drafting and Presentation Tools: Draw any geometry you need to see or share. Use angles and scale to easily generate and share views of your models. (video: 1:45 min.) CAD Tools and Enhancements: Improved data management and collaboration tools. Publish and retrieve data across workgroups using the Advanced Sharing capabilities. Bookmarks: Create Bookmarks for the parts of your drawing that you often reference. Add Bookmarks to text, dimensions, annotations, and other objects in your drawings. Automatic Named Captions: Automatically tag drawings and annotate them with your choice of descriptions and keyword tags. If you add a tag to an object, it automatically shows up as a color-coded text title. User-Defined Exportable Line Styles: Line styles are now more powerful and easy to export. You can now export all or part of a line style as a set of XREF styles, making it easier to apply or modify line styles across drawings. You can also share line styles with other people. Enhanced Drawing Snap to Axis Tools: Quickly draw, show, or insert an axis in any view. Draw directly from an active viewport or an annotation to specify the axis angle. Use the arrow keys to specify an axis angle. Efficient Dimension: Maintain hierarchy and support for negative sizes. Edit dimensions directly to remove parts. Edit dimension text attributes. Use multiple tools at once and enhance existing dimension tools to allow editing and automatic insertion of distances. Improved Auto-Annotate: Automatically apply or remove annotation with a click of a button. Drag and drop annotations to specify their placement. Quickly rearrange annotated text or select objects and annotate

them. Auto-Annotate works in all views. Text Object Performance and Appearance Enhancements: You can edit the font and color of text while it is selected in Auto-Annotate. Work with annotated text in the text editor. You can quickly convert text to a rectangle, circle, polyline, or other text objects. Drawing Clipping:
