More info It's no secret that you're probably constantly looking for the latest security software for your home, so you can ensure that it's safe to browse the internet, or so that you don't have to worry about your financial information being compromised. The last thing you want is to become a target for criminals, or someone who wants your money, just so they can cause a lot of damage. Of course, there are a ton of security programs on the market, and

they all have their pros and cons, but one of the main features they tend to have in common is that they can be somewhat complex to use. That's where LastPass comes in. This app is designed to be simple to use, so you don't have to be an IT guru in order to protect yourself. Instead, you're given a couple of fields, and it automatically fills them in as you're browsing the internet. Once you've finished, you can just share the saved URL with others, which will give them access to all of the private information. You can create up to 10 different passwords to use in the LastPass app, and you can also find them all in one location, as well as add new ones whenever you're creating new fields, and you'll also have the ability to back up your passwords, so that you don't have to
