The present invention relates to a new and distinct cultivar of Baptisia plant, botanically known as *Baptisia hybrida* and hereinafter referred to by the name 'Dueoplavart'. The new Baptisia plant is a product of a planned breeding program conducted by the Inventor in Rheinberg, Germany. The objective of the breeding program is to create new compact and freely branching Baptisia plants with numerous attractive flowers. The new Baptisia plant originated from a cross-pollination made by the Inventor in July, 2007 in Rheinberg, Germany of a proprietary selection of *Baptisia hybrida* identified as code number F-27-13, not patented, as the female, or seed, parent with a proprietary selection of *Baptisia hybrida* identified as code number F-1-08, not patented, as the male, or pollen, parent. The new Baptisia plant was discovered and selected by the Inventor as a single flowering plant from within the progeny of the stated cross-pollination in a controlled greenhouse environment in Rheinberg, Germany in May, 2011. Asexual reproduction of the new Baptisia plant by terminal cuttings in a controlled greenhouse environment in Rheinberg, Germany since July, 2011 has shown that the unique features of this new Baptisia plant are stable and reproduced true to type in successive generations.}} "return; " " " " " "void main()

## What's New In AutoCAD?

Drawing annotations: Now you can view, edit, and control a drawing annotation directly in a model. Draw a circle, square, or ellipse, and annotate the drawing with comments. (video: 1:22 min.) Enhanced annotate tool: Use the new annotate tool to annotate drawings or model parts. Choose from a variety of options to draw and edit annotations, including text, arrows, and more. You can then attach notes to the selected annotate tool. (video: 1:17 min.) Drafting and 3D modeling tools: Improve your hand-drawn sketches to the level of precision, resolution, and consistency that you have come to expect from your AutoCAD drawings. Now you can sketch a model on paper and then import that drawing into a 3D model for further refinement. (video: 1:15 min.) Drafting tool improvements: Improved drawing accuracy, including dynamic cursor and snap to grid. Make better engineering decisions with the new optional Tolerance, Reset, Tolerance, AutoFit, and Angle input parameters. (video: 1:12 min.) Improved 3D modeling tools: On-the-fly creation of meshes from extruded face selections. Select
