JamSec WebDefenseur Crack Free Download PC/Windows

JamSec WebDefenseur For Windows [March-2022]

JamSec WebDefenseur is a best security software to protect your websites against unauthorized intruder and hacker. It also provides specific security solutions to prevent virus, malware, spam, and other threats on your website. JamSec WebDefenseur integrates the following functional modules: 1. Firewall. You can choose between three most popular firewall options: ZoneAlarm, Norton, or Comodo and you can also set a custom firewall rule. 2. Firewall exceptions. You can specify an exception to allow access to particular web sites and access to certain categories of programs and ports. 3. Proxy. You can use your favorite proxy protocol. 4. Proxy exceptions. You can identify and define proxy specific exceptions, such as access to specific websites and to particular types of web applications (like a web application firewall), or access to specific programs and ports (such as web application servers). 5. Inbound and outbound blocking. You can block incoming or outbound connections. 6. Web site password protection. You can limit access to particular web sites by using passwords. 7. Anti-Spam filter. You can use anti-spam filters for on-site and off-site filtering of your e-mail messages and to block the receipt of e-mail messages that are malicious. 8. Anti-virus scanner. You can use anti-virus scanners for on-site and off-site scanning of files for viruses and other malicious software. 9. Scan on demand. You can schedule a scan of a selected file or folder and automatically run it on demand. 10. Time-based filtering. You can control the protection of your computers based on the time of day and the days of the week. 11. You can set an alert notification, whenever there are changes on the computer. 12. Scheduled scans. You can schedule a scan on a selected time and day or you can run a scan on demand, when a file or folder is accessed. 13. Scripts that can be installed on a website or a server can be used to help maintain site security (such as a script that notifies an administrator when a new user is created). 14. Web site password protection. You can limit access to particular web sites by using passwords. 15. Proxy. You can use your favorite proxy protocol. 16. Inbound and outbound blocking. You can block incoming or outbound connections. 17. Anti-Spam filter. You can use anti-

JamSec WebDefenseur Crack +
